WHAT SHOULD YOU INCLUDE IN YOUR PROPOSAL?

This varies for each title but you should consider the following:

- **Covering letter** – Explain why the market needs your book. Include a brief competitor review that covers other titles in the area. Don't be put off if there are other titles, we will be looking to see what makes your title unique. Detail who you think the target market is and how large you think it is. Think about the time it will take you to write the title and give a realistic delivery date for the manuscript
- **Synopsis** – Describe the aim and scope of the title. Summarise the approach you will take and the content to be covered. Include a draft table of contents and if you are intending to have contributing authors, any suggestions you may have for them. Indicate how in depth you intend the title to be. This section is the heart of your proposal so ensure that you have shown why your title has the potential to be successful
- **Sample Chapters** – A draft chapter included with a proposal would be an advantage as this will give us a clear indication of writing style and content level. The chapter does not need to be a finished version, but should cover the essence of your style and approach and include any features that you intend to use within the book
- **Curriculum vitae** – Provide details on your professional experience, as well as any previous publishing experience. Don't worry if you haven't had any previous publishing experience, this information will highlight that we need to give you more support during the process
- **Additional material** – Include any other supporting material that you think would be useful in demonstrating the market for your title

At Sweet & Maxwell we undertake to consider your proposal professionally and quickly. If we decide not to pursue publication, we will provide feedback and fully explain the reasons behind our decision.

THE FUNDAMENTAL SERIES

Introducing your students to the fundamental principles of a subject by way of clear text combined with charts, grids and diagrams

- Sets out a clear framework and explains the intricacies of an area of law as clearly as possible without sacrificing the detail that is required for a proper understanding
- Includes full coverage of all topics likely to be studied at undergraduate level, on Diploma in Law (CPE) programmes, and ILEX level 6
- Makes use of headings and sub-headings to lead students through the work with ease
- Assumes no prior knowledge of the subject – allowing the books to be used for those new to the subject and for distance learning courses
- Facilitates learning with clear language and bite-size chunks of text
