

HOW TO INSTALL EXPRESS WILLS AS A SINGLE USER

To begin the installation, place the CD-ROM in your CD-ROM drive. The installation should begin automatically. If not, click on the start button in the bottom left of your screen, then select run and type `d:\setup.exe`, where 'd' is the letter corresponding to your CD-ROM drive. If your drive letter is designated by an alternative letter please amend the selection accordingly.

Once the CD-ROM has started to install you will see the welcome screen. As a precaution, please close any other programs that you have open. To proceed, click on the 'Next>' button.

You will then be shown the Licence Agreement. The next dialogue box refers to the destination folder for the installation. The default for this will be `C:\samwills`. Please only change this if you have good reason to do so.

You will then be given an option to create a backup of the files that will be affected by the installation of the program. It is strongly advised that this option is selected.

At the last screen you will see confirmation that the program is ready to install. By selecting the 'Next>' button the installation will be finalised and an icon for the program will be added to your desktop.

The program is now ready to be used. Once it has been launched on your computer the 'View getting started' option will provide you with assistance and guidance on using **Express Wills**.
